

BLISTER CARDS

Quality Assured Label's Blister Cards are produced 100% in-line — offering cost savings and quicker turn-around times. Apply specialty coatings and inks for added value

Quality Assured Label's R+D team has engineered a proprietary adhesive solution to securely seal hard to bond blister card materials (such as metallized board and plastic and PET blisters).

FEATURES

- Add specialty coatings, techniques and inks (Q-Vations) to stand out in the marketplace
- Print front and back
- Spot adhesive patterns promote the use of PET vs. PVC blisters
- Potential cost savings by downgrading material thickness and applying QAL's hanger support strip
- Include secondary labeling and coupons

PRINTING CAPABILITIES

- Print up to 11 colors
- Multiple foiling, varnish, and laminate options
- UV Flexo and/or screen printing
- 1" x 1" minimum size
- 15" x 20" maximum size

MATERIALS

- A wide range of board, plastic and specialty substrates available
- Green solutions material provider
- Board: up to .020" (20 point) thickness
- Plastic substrate: up to .016" (16 mil) thickness
